Jakarta Utara, DKI Jakarta

Data Science graduate from Purwadhika with a Bachelor's degree in Communication Science. Combines analytical data skills (Python, MySQL, Tableau) with strong communication abilities to transform data into actionable business insights. Experienced in end-to-end data processing, EDA, and predictive modeling through hands-on projects.

Education Level

Purwadhika Digital Technology School - DKI Jakarta <i>Certificate in Data Science & Machine Learning Program</i> - Built a basic CRUD application using Python to manage and manipulate structured datasets. - Performed data cleaning, preprocessing, and exploratory data analysis (EDA) to identify patterns and insights. - Created data visualizations to communicate analytical findings effectively. - Applied basic machine learning models for predictive analysis in hands-on data projects.	Nov 2025 - May 2026
Kalbis Institute  - DKI Jakarta <i>Bachelor of Communications Science, 3.49/4.00</i>	Sep 2019 - Jul 2023

Work Experiences

PT. Prima Alkesindo Nusantara - DKI Jakarta <i>Office Administration Data & Documentation Support</i> - Managed and organized company files, records, and operational datasets to maintain structured documentation. - Responded to inquiries from internal marketing teams and clients while ensuring accurate record keeping. - Processed and tracked E-Catalog orders using structured spreadsheets (Excel/ Google Sheets), maintaining transaction records to support monthly operational reporting	Aug 2024 - Jul 2025
Pergikuliner Event - DKI Jakarta <i>Event Marketing Internship</i> - Assisted in coordinating tenant participation and managing communication related to event activities. - Prepared promotional materials including banners, posters, and social media content to support event marketing. - Monitored event activities and documented event outcomes to support internal evaluation and reporting.	Apr 2024 - Jun 2024
Ministry of Maritime Affairs and Fishers - DKI Jakarta <i>Social Media Planner Internship</i> - Developed weekly Instagram editorial plans based on content strategy and campaign objectives. - Monitored audience engagement including comments and interactions to understand audience behavior. - Evaluated content performance and summarized insights to support future content planning.	Jun 2022 - Aug 2022

Projects

Cartify E-Commerce Customer Churn Analysis and Prediction - Built an XGBoost churn prediction model with threshold optimization (0.38), achieving F2-Score 0.89 on test data — prioritizing recall to minimize undetected churn cases. - Identified key churn drivers using SHAP beeswarm analysis, providing interpretable feature importance for business stakeholders. - Developed a 3-tier risk segmentation system (Low / Medium / High Risk) from model probability scores, enabling retention teams to prioritize treatment by urgency level.	Apr 2026 - May 2026
Syarah.com Second Car Price Prediction - Built a machine learning regression model to predict used car prices on the Syarah.com marketplace, providing an objective price benchmark for sellers and buyers - Applied full ML pipeline including categorical encoding, numerical scaling, multi-algorithm comparison, and hyperparameter tuning to optimize model generalization - Reduced pricing inefficiency risk for marketplace sellers by providing an objective price benchmark based on vehicle specs, brand, transmission, engine capacity, and region	Feb 2026 - Mar 2026
SaaS Software Sales Performance Analysis Conducted diagnostic analysis on a multi-country SaaS sales dataset to identify structural drivers of revenue performance and customer	Jan 2026 - Feb 2026

retention

- Analyzed key business metrics including sales performance, customer retention, discount utilization, and product profitability.
- Designed data visualizations to effectively communicate complex geographical sales trends and revenue metrics to non-technical stakeholders.

Superstore Customer Retention Analysis

Dec 2025 - Jan 2026

- Analyzed historical customer purchasing behavior by implementing cohort retention analysis to measure user lifecycle and loyalty over time.
- Created visual retention trends and matrices using heatmaps and line plots to simplify trend tracking for operational evaluations.
- Delivered insights and recommendations to support customer loyalty and repeat-purchase strategies.

Motorcycle Spareparts Inventory System

Nov 2025 - Dec 2025

- Developed terminal-based CRUD (Create, Read, Update, Delete) applications using Python to manage product inventory for an online motorcycle spareparts marketplace
- Designed data structures and workflows to manage product information, stock control, supplier records, and purchasing transactions.
- Applied Python fundamental programming concepts including modularization, functions, loops, and conditional logic.

Gasoline Shop and Station Inventory System

Nov 2025

- Developed terminal-based CRUD (Create, Read, Update, Delete) applications using Python to manage product inventory for a gasoline station.
- Designed data structures and workflows to manage product (Gasoline, Diesel, Oil product), stock control, and transactional operations.
- Applied Python fundamental programming concepts including modularization, functions, loops, and conditional logic.

Skills, Achievements & Other Experience

- **Languages:** Bahasa Indonesia (Native), English (Intermediate)
- **Programming:** Python, SQL (MySQL)
- **Developer Tools:** Visual Studio Code (VS Code), Jupyter Notebook, GitHub
- **Data Analytics & Data Visualization:** Seaborn, Matplotlib, Tableau, Google Looker Studio.
- **Machine Learning & Modeling :** Pandas, NumPy, Scikit-Learn, Exploratory Data Analysis (EDA), Data Cleaning & Preprocessing, Machine Learning Classification & Regression
- **Soft Skills:** Analytical Thinking, Problem Solving, Data Storytelling & Communication, Team Collaboration, Adaptability
